

## 7.1.2 The Institution has facilities for alternate sources of energy and energy conservation measures

- **Use of solar lights:**

In addition to being an extremely promising form of energy, solar energy is produced by the sun's light is Renewable, Inexhaustible, Non- polluting, that helps in prevention of global warming, and contributes to sustainable development. To reap the benefits of solar energy, the College has installed two solar lights at the main entrance as a pilot project. Further, the college is planning to install more of such lights in the coming days. Moreover, installation of rooftop solar panels have been discussed and approved by the

governing body of the college and the same shall be installed within a short period.

- **Use of LED Bulbs:**

The college has replaced all the lights of the college campus to LED lights aiming to minimize the consumption of electric energy.
