Action Taken Report

The students Satisfaction Survey Report (SSS) 2017-2018 prepared by Internal Quality Assurance Cell (IQAC) is received by the office of the Principal on 1st June 2018.

From the analysis done on each of the 14 questions contained in the Students' Satisfaction Survey, the responses of the students were positive and encouraging for almost all the aspects. However, one common factor that needs to be looked into and addressed by the authority as well as by the departments concerned is related to the use of ICT in the classroom for teaching purposes. The feedback from the students indicate that they prefer teaching aids other than the traditional 'chalk and talk' method to impart education in the classroom and desire the usage of ICT for such purposes. This calls for having atleast one digital classroom in each department and faculty may use audio-visual aids in classroom teaching.

As per the feedback report, the appropriate and necessary actions are taken.
